

Jikun Cai

Shanghai, China

jkcai24@m.fudan.edu.cn — GitHub — Google Scholar

Education

Fudan University, Shanghai, China

Sep 2024 – Jun 2028 (Expected)

Bachelor of Science in Artificial Intelligence

- GPA: 3.76/4.0 (94/100)
- Recipient of Fudan University Third-Class Scholarship
- CET-6: 619

Research Interests

Embodied AI, Vision-Language-Action Models (VLA), World Action Models (WAM), Multimodal Learning, Robot Learning, Robot control.

Research Experience

MMLab@NTU(S-Lab), Nanyang Technological University

Jun 2026 – Present

Research Intern

Advisor: Prof. Ziwei Liu

- Research on whole-body control and dexterous manipulation.

FudanNLP(OpenMOSS Lab), Fudan University

Sep 2025 – Jun 2026

Research Intern

Advisor: Prof. Xi-Peng Qiu

- Conduct research on embodied intelligence and Vision-Language-Action models.
- Collaborate on open-source research projects and benchmark infrastructure.

Publications

LIBERO-Plus: A Progressive Robustness Benchmark for Visual-Language-Action Models

Senyu Fei*, Siyin Wang*, Junhao Shi, Zihao Dai, **Jikun Cai**[†], Pengfang Qian, et al.

* Equal contribution [†] Co-second author

Proceedings of the IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR), 2026

- Project Repository: github.com/sylvestf/LIBERO-plus
- Google Scholar Citations: 93+(until June 2026)

Ongoing Research

Reasoning-Augmented World Action Models for Embodied Intelligence

- Leading an ongoing research project on reasoning-augmented world action models for embodied agents.
- Investigating how world models can support counterfactual reasoning and long-horizon planning beyond next-state prediction.
- Exploring reasoning-guided action generation for robust generalization under novel tasks and environments.

Selected Projects

FlowEvo-PickScore

Computer Vision Project

- Implemented and evaluated preference-guided optimization pipelines for generative models.
- Explored reward-based learning and visual quality assessment methods.
- Repository: FlowEvo-pickscore

Technical Skills

Programming Languages: Python, C++

Machine Learning: PyTorch, Transformers, Deep Learning, Large Language Models, Reinforcement Learning

Tools: Linux, Git, Docker, LaTeX

Research Areas: Embodied AI, VLA/WAM, Multimodal Learning, LLM Agents
